Assembly Instructions

SeaAira Adirondack Rocker — Page 1

Tools Needed: hammer, 7/16" wrench, #2 square bit screw driver or power driver, No drilling is required. All the necessary holes are predrilled. Bolts fit snugly in the holes. You may need to use a hammer to drive the bolts through the holes.

Parts

Step 2 — Attach legs to seat assembly

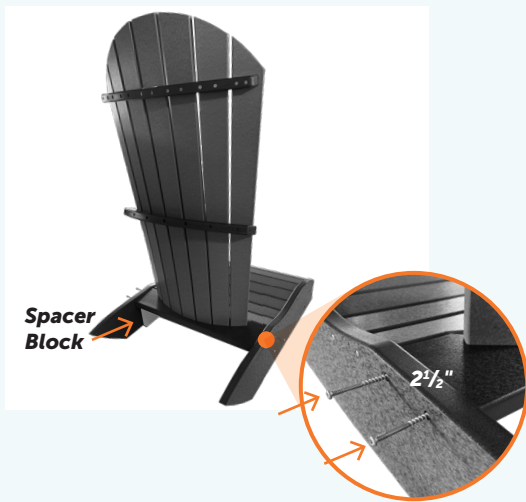

4 – 2¾" Carriage bolts with nuts, 2 leg assemblies

Push 2 carriage bolts through the holes in the leg assembly. Rest the seat and seat back on it's side. Align the Rocker Arm Assembly and Carriage Bolts with the pilot holes on the seat assembly. Tap the bolts with a hammer to set them firmly against the seat assembly. Place nuts on the back side of the bolts and tighten securely. Repeat for the other Rocker Arm Assembly.

Step 1 — Fasten back assembly to seat assembly

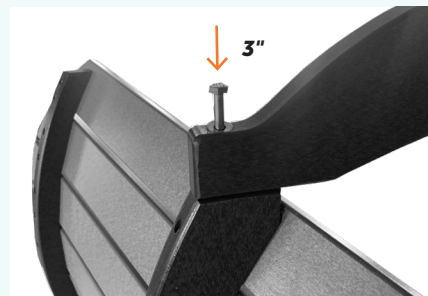

4 – 2½" Screws, back assembly, seat assembly

Place the parts on a protected surface such as cardboard or blankets to assemble them. Place the two spacer blocks close to the side rails of the seat assembly where the back attaches. Set the back on top of the space blocks. Push the back into the seat against the back seat slat. Fasten with the four 2½" screws using the pilot holes in the seat side rail.

Step 3 — Secure arms to back assembly

2 – 3" Lag bolts with washers, 2 arms, back assembly

Place a washer on a 3" lag bolt. Align the pilot hole in the back of the Rocker Arm Assembly with the pilot hole of the Back Assembly. Fasten the two together using the 3" lag bolt and washer. Repeat for the other Rocker Arm Assembly.
